

## STQA Practical 3

**Name** – Prasad Thorve

**Roll NO** – BC41

**Problem Statement** - Create a Defect Report for Any application or web application.

### **Solution -**

In this example, I have outlined a defect related to the inability to edit profile information in an online shopping application, following is the specified defect report :

**ID:** 23431

**Project:** Online Shopping Application

**Product:** ShopNow

**Release Version:** 2.0.1

**Module:** User Profile

**Detected Build Version:** 2.0.1.123

**Summary:** Unable to edit profile information

### **Description:**

When attempting to edit the user profile information (e.g., name, email, address) and clicking on the 'Save Changes' button, the changes are not saved. The system does not reflect the updated profile information even though the 'Save Changes' operation is confirmed.

### **Steps to Replicate:**

1. Log in to the application using valid credentials.
2. Navigate to the 'My Account' section.
3. Click on the 'Edit Profile' button.
4. Modify any profile information (e.g., change email address).
5. Click on the 'Save Changes' button.

6. Observe that the changes are not saved, and the original information is retained.

**Actual Result:** The changes made to the profile are not saved, and the original information persists.

**Expected Results:** The application should save the modified profile information and reflect the changes accurately.

**Remarks:** This defect affects user experience and data accuracy within the application.

**Defect Probability:** Medium

**Defect Severity:** High

**Defect Priority:** Medium
